Providing an unparalleled dynamic that elevates and accentuates a message and brand, but also maximizes the return on tradeshow investment. Formulate Fusion is Origin's collection of 20ft x 20ft exhibit kits and custom solutions. A fusion of FORM, FABRIC and FUNCTION, these kits combine organic and architectural shapes with state-of-the-art zipper pillowcase dye-sublimated fabric graphics to create unique, dynamic and functional island space.

**features and benefits:**
- 50mm aluminum tube frame
- Single-sided SEG dye-sublimated push-fit fabric graphics
- Shelves available in four thermoform finishes, shown below

Connection Methods

Formulate® structures use a number of different yet simple connection methods. Your kit will include one or more of the connection methods shown below. Steps within the Kit Assembly will reference a specific method for each connection point.

Connection Method 1:
ES30 / ES50 / ES75

Compress the unlocked connector and slide one tube onto each end. Lock both screws carefully using your allen key tool. Be sure to lock securely, but do not overtighten.

Connection Method 2:
Snap Buttons & Swage

Locate the snap button on the connector or swage tube. Locate the hole on the corresponding tube. Press the snap button with your thumb and slide the tube and connector together so that the snap button snaps fully into the lock hole. To disassemble, press the snap button and pull apart.

Connection Method 3:
ES30-90B / ES30-I / ES30-C

Compress one unlocked end of the connector and slide it through one tube end. Compress the other end of the connector and slide the second tube on. Lock both screws carefully using your allen key tool. Be sure to lock securely, but do not overtighten.

Connection Method 4:
Tube Clamps

TCP
TC
TCH

Be sure to fully assemble all frames before using clamps. With the clamp unlocked, place one tube of the first frame into the mouth of the clamp. Place the second tube (if applicable) into the second mouth of the clamp. With both frame's tubes in the clamp, be sure to lock securely, but do not overtighten.
Kit Assembly
Step by Step

Step 1.
Gather the components necessary for assembling (2) Frame A. Assemble in the order the Labeling Diagram instructs.
Refer to Connection Method 1 for additional information.

Step 2.
With frame laying flat on the floor, locate your pillowcase graphic. With the pillowcase unzipped, encase the frames and zip along the side.

Step 3.
Gather the components necessary for assembling (2) Frame B. Assemble in the order the Labeling Diagram instructs.
Refer to Connection Methods 1 for additional information.

Step 4.
With frame laying flat on the floor, locate your pillowcase graphic. With the pillowcase unzipped, encase the frames and zip along the side.
Gather the components necessary for assembling Frame C. Assemble in the order the Labeling Diagram instructs. Refer to Connection Methods 1 and 2 for additional information.

Step 6.
With frame laying flat on the floor, locate your pillowcase graphic. With the pillowcase unzipped, encase the frames and zip along the side.

Step 7.
Locate your bases. With the frames still laying on the ground, attach your bases to each end of Frame A using the provided LN114 Screws.

Step 8.
Locate your pillowcased Frame B assemblies. Stand your Frame A assemblies and connect them using the Frame B assemblies. Refer to Connection Method 2 for additional information.
Kit Assembly

Step 9.
Locate your pillowcased Frame C assembly. Attach Frame C to the underside of your Frame A assemblies.
Refer to Connection Method 1 for additional information.

Step 10.
Locate your (6) shelves. Use the provided thumbscrews to attach the shelf to the welded plates of the protruding tubes.

Step 11.
Locate your monitor brackets. Thread the provided square bolts through the back of the steel plates. Push the monitor bracket onto the bolts utilizing the holes in the bracket. Use (2) washers and (2) wingnuts to lock the monitor bracket to the plate.

Setup Complete
